

Callback Functions Using Function Pointers In C: C Tutorial In Hindi #73.mp4 - VLC media player

FUNCTION POINTERS

- ✓ We can have pointers pointing to functions as well
- ✓ Function pointers point to code and not data
- ✓ Function pointers are useful to implement callback functions
- ✓ Unlike normal pointers, we do not allocate/de-allocate memory using function pointers.

CALLBACK FUNCTIONS

- ✓ Function pointers are used to pass a function to a function
- ✓ This passed function can then be called again (hence the name callback function).
- ✓ This provides programmer to write less code to do more stuff.
